PRINOTH CONNECT SMART ZONE

CONTROL CRITICAL ZONES

Smart Zone revolutionizes safety and efficiency in slope grooming. By automatically notifying the driver and actively adjusting the speed when entering a designated zone, this cutting-edge system ensures safer, smoother slope preparation. It helps simplify work processes, improve communication and increase control over vehicle fleets, which helps minimize risks and potential damage.

NAVIGATE WITH CONFIDENCE

Operators move safely, even in unfamiliar terrain, fully focusing on the actual task of creating perfect slopes.

AUTOMATE FOR EFFICIENCY

Standardized tasks keep everything running smoothly.

REDUCE COSTS AND DOWNTIME

Proactive controls prevent expensive repairs.

PROTECT YOUR TEAM AND ASSETS

Advanced safety features minimize risk.

FEATURES

- Define critical zones directly on the Object Editor map
- Automated speed reduction in critical areas to pre-set levels
- Web based application for easy, real-time access and management
- Real-time alerts to navigate complex environments
- Designed exclusively for Prinoth vehicles equipped with Fleet Management
