# PRINOTH CONNECT SMART ZONE

## CONTROL CRITICAL ZONES

Smart Zone revolutionizes safety and efficiency in slope grooming. By automatically notifying the driver and actively adjusting the speed when entering a designated zone, this cutting-edge system ensures safer, smoother slope preparation. It helps simplify work processes, improve communication and increase control over vehicle fleets, which helps minimize risks and potential damage.

## NAVIGATE WITH CONFIDENCE

Operators move safely, even in unfamiliar terrain, fully focusing on the actual task of creating perfect slopes.

## AUTOMATE FOR EFFICIENCY

Standardized tasks keep everything running smoothly.

## REDUCE COSTS & DOWNTIME

Proactive controls prevent expensive repairs.

## PROTECT YOUR TEAM & ASSETS

Advanced safety features minimize risk.

## FEATURES

- Define critical zones directly on the map
- Automated speed reduction in critical areas to pre-set levels
- Web based application for easy, real-time access and management
- Real-time alerts to navigate complex environments
- Designed exclusively for Prinoth vehicles equipped with Fleet Management
