

# TRANSPORT CABIN

PASSENGERS, MATERIALS AND RESCUE

## TRANSPORT CABIN

# THE MULTIPURPOSE TRANSPORT CABIN

The Transport Cabin for Bison or Leitwolf was developed for two main purposes—transporting people and carrying materials. Important to note is that the Transport Cabin places no restrictions on the standard use of the vehicle. The tiller, blade even cross-country preparation equipment can all be used simultaneously. Additionally, the cabin is used for a wide variety of applications including:

- Cat skiing
- Excursions for tourists
- Shuttling guests within a ski resort
- Carrying materials within ski resorts
- Transporting work crews and materials to remote facilities
- Rescue operations

### FOR PASSENGERS

For unforgettable experiences, the Transport Cabin has all-around windows offering panoramic views, a sound system and power outlets so that passengers can charge their devices on the go. With room for 15 people and their skis, as well as 6 snowboards, guests can be driven in style to their destination. Both safety and comfort, have guided the design of the cabin — with two sunroofs and a window in the door, fresh air can circulate easily. For increased comfort and passenger enjoyment, heating and air-conditioning units are available as optional extras.

The seatbelts, ROPS certification, auto-stop function when the door is opened and intercom system with the operator all ensure the utmost safety for passengers and peace of mind for the operator.

### FOR MATERIAL TRANSPORTATION & RESCUE

With foldable benches the Transport Cabin offers a massive capacity of 11.3 m<sup>3</sup> (14.8 yd<sup>3</sup>), enabling the easy transportation of supplies and materials. Often used for the maintenance of remote facilities such as wind farms, cell towers and powerline maintenance, features like the rearview camera help operators get close to structures easily and safely. The cabin also ensures safe and comfortable passage for work crews with optional heating and air conditioning, power outlets, seatbelts and a ROPS certification. In addition, with a fixation point for a rescue sled, the cabin can be used to evacuate individuals in need of medical care and transport them quickly and safely.

### COMPATIBLE VEHICLES

**BISON & BISON WINCH** (with Stage V engine)\*

**LEITWOLF & LEITWOLF WINCH** (with 3B/Tier 4 and Stage V engine)\*

\*Winch has to be dismantled

### TECHNICAL DATA

Maximum Height Leitwolf	11'7"   3,540 mm*
Maximum Height Bison	11'6"   3,510 mm*
Width of Cabin	13'2"   4,005 mm
Cargo Space	11,247 liter / 14.8 yd <sup>3</sup>   11.3 m <sup>3</sup>
Loading Opening	width 2'5"   730 mm; height 5'2"   1,580 mm
Rops Leitwolf	certified to 16,000 kg
Rops Bison	certified to 15,500 kg
Seats	Space for 15 people
Skis	15 pairs (optional)
Snowboards	6 (optional)
Power Outlets	3 USB Type C, 3 USB Type A, 1 12V socket

\*Air conditioner on Transport Cabin installed (optional)
