

ALL-SEASON TRACKS

RUBBER COATED STEEL TRACKS

ALL-SEASON TRACKS

RUBBER COATED STEEL TRACKS

The All-Season Tracks are designed to minimize surface impact on terrains with little or no snow, making them the ideal year-round accessory for your Husky.

PERFORMANCE ON ALL TERRAIN

The All-Season Tracks deliver excellent driving performance on all types of terrain. The rubber coated crosslinks reduce surface impact, enabling efficient operation on soft surfaces like soil and hard surfaces such as asphalt. Their V-shaped rubber design maximizes traction and enhances driving performance, making them perfect for snow groomers operating on terrain with little or no snow.

INCREASED DURABILITY

The hinge lock system on the All-Season Tracks allows the tracks to follow the natural contours of the terrain, maximizing traction and enabling smooth steering. By evenly distributing forces across the track, the hinge lock system reduces stress on individual components. Combined with the metal construction inside the rubber, this design reduces wear and tear, ensuring a longer operating life of the tracks. Overall, the All-Season Tracks enhance stability and control, increase durability and reduce maintenance costs.

COMPATIBLE VEHICLES

HUSKY 2.5	(GENERATION HK, HS & HU)
HUSKY 2.8	(GENERATION HK)

TECHNICAL DATA

Vehicle width 2.5	2.595 mm 8'6"
Vehicle width 2.8	2.775 mm 9'1"
Weight of one track 2.5	415 kg 915 lb
Weight of one track 2.8	425 kg 926 lb
Width of one track 2.5	775 mm 2'7"
Width of one track 2.8	955 mm 3'2"
Distance between tracks 2.5	1.045 mm 3'5"
Distance between tracks 2.8	865 mm 2'10"
Height of tracks	81 mm 3"
Pitch	111 mm 3'4"
Number of crosslinks	66
