MAINTENANCE OVERVIEW

Stay on top of all repairs and maintenance work

Whether it's a single snow groomer or an entire fleet, Maintenance Overview allows easy and efficient management and organization of all maintenance and repairs.

Save time and costs through optimized and standardized processes

Reliable operation and longer service life of all vehicles thanks to fast problem analysis, transparent documentation and perfect planning—no overdue maintenance, spare parts are always ordered on time

Fast and easy communication within the team thanks to the use of one system for all maintenance-related activities—no information gets lost between slips of paper, messages and lists

Easy communication of repairs Take a picture of what needs to be repaired with a cell phone, upload it to the app—job done

FEATURES

- All data available in real time via the online resort management platform Skadii
- Easy to use on all devices such as PC, tablet or cell phone (suitable for Android and iOS), even in offline mode
- Automatic data backup in the cloud
- Automatic web-based synchronization between all devices
- Integration of live data from PRINOTH Fleet Management on status, operating hours, etc.
- Integration of standardized maintenance plans, maintenance history and upcoming repair work of all vehicles with reminder function for optimal planning deployment
- Overview of all maintenance steps and daily checks, including notification service

 **Increase efficiency**
 **Save resources**
 **Reduce costs**
